

Guillaume Sabiron

Innovation Project Manager, Ph.D.

63 Avenue Paul Santy

69008 Lyon - France

+33 6 74 20 00 23

✉ Guillaume.Sabiron@gmail.com

in [gsabiron](https://www.linkedin.com/in/gsabiron)

36 years old – French Nationality

WORK EXPERIENCE

- Jan. 2021 **R&D Project Leader**, [IFPEN](#), Solaize, France
- Today **Connected Mobility**, Development of AI-based solutions for connected mobility and air quality
- Animation of project team (20+ MSc & PhD) and management of innovations from initial ideas to the POCs ([Geco Air](#) - 60k+ users, 100M+ km-, APIs, Webservices, Dashboarding, KPIs, IoT, ...)
 - Scientific and technical coordination of the project (Machine Learning, Back-end, Front-end, Modeling)
 - Definition of the resources and skills required for the development of technical solutions
 - Development of partnerships and setting up of multi-partner projects in an international context
- Oct. 2014 **Control Systems research engineer**, [IFPEN](#), Solaize, France
- Jan. 2021 **Transport**: HDV energetic diagnosis - Pollutant footprint - Connected vehicles, sustainable mobility.
Wind: Wind LiDAR control & software dev., Onshore/Offshore wind-field simulation tools.
Wave: Design and experimental validation of MPC solutions on the wave energy conversion system.
Management: Engineers, Students (MSc, Ph.D.): Control, Machine Learning, Software Dev.
Training coordinator, International conferences, workshops, and expert groups
- Sept. 2011 **Research engineer in Bio-inspired Robotics**, [ONERA/ESA/AIRBUS/CNRS](#),
- Sept. 2014 Design of a bio-inspired GN&C solution for safe and soft lunar landing
- Development and in-flight testing of minimalistic optic flow vision sensors,
 - Design of a visual-based Guidance Navigation and Control loop for safe and soft lunar landing,
- 2012 – 2013 **Teaching activities (MSc)**, [ISAE](#) & [Aix-Marseille Univ.](#), France
- Modelling, Control, Identification and Analysis of Linear Systems, Signal processing and Filtering,
- 2011 **Engineer trainee**, [LSIS](#), [Aix-Marseille Univ.](#), Marseille, France,
- Design and implementation of a robust flight control law for an UAV
- 2008 **Research trainee**, [MICA-CNRS](#), Hanoï, Vietnam
- Study of a GPS localization solution based on Open source GIS

EDUCATION

- 2011 – 2014 **Ph.D. candidate in Bio-inspired Robotics**, [ISAE-SUPAERO](#)
- Keywords: Guidance Navigation & Control, UAV, Bio-Robotics, Aerospace, Lunar Landing, Optic Flow
- 2010 – 2011 **Specialization semester in control theory**, [LTH](#), Lund, Sweden
- 2006 – 2011 **Engineering degree (MSc) Grenoble INP (INPG)**, [ESISAR](#), Valence, France
- Electronics, Computer Science and Control Theory (Specialization: Advanced Control),
Top of my year for three years, with honors

SKILLS

Project management	Risk analysis, intellectual property, planning and management of resources to achieve deliverables, capitalization, internal/external communication, project development, contractor management		
Applied science	Data science, Machine/Deep learning, Signal processing, Software development, Microcontrollers		
Control Theory	Linear/Optimal/Non-linear/Predictive control, System Identification, Dynamic Modeling		
Software	Anaconda, Matlab/Simulink, MPLab, dSPACE, Gimp, Microchip microcontrollers		
Programming	Python (Pandas, NumPy, Sklearn, ...), Gitlab, C, Java, Swift, MongoDB, $\text{\LaTeX}$		
Soft skills	Adaptability, Autonomy & Team work, Curiosity, Persuasion and Organization		
Languages	French ●●●●●●●	English ●●●●●●●	Spanish ●●●●●●●

ACTIVITIES AND INTERESTS

- Travels Chile, China, North-America, India, South Korea, Vietnam, Chile, North-Africa, Mauritius, ...
- Hobbies Paragliding, Scuba-diving, Climbing, Snowboarding, Hiking, ...
